România

Este o țară locată în centrul, estul și sud-estul Europei.

It is a country located in central, eastern and south-eastern Europe.

Județul Maramureș este situat în partea de nord-vest a României și este unul dintre cele 41 de județe ale țării.

Maramureș County is located in the northwest of Romania and is one of Romania's 41 counties.

The landform is predominantly mountainous and having the appearance of a large natural amphitheater, inside which is the Maramureș

Maramureșul este reprezentat de numeroasele obiective turistice precum:

Maramureș is represented by numerous tourist attractions such as:

The Merry Cemetery of Săpânța

where the funny or sadder messages on the blue crosses, summarize the lives of those who rest there.

The Sighet Memorial Museum

This museum is built in a former prison and is a space dedicated to the horrors that happened during the communist regime in Romania.

The MOCĂNIȚA

steam train route of the Vaser valley – Vișeu de Sus is another tourist attraction of Maramureș

WOODEN CHURCHES

In 1999, a number of eight churches, masterpieces of wooden architecture in Maramureș, were included in the UNESCO World Heritage List, symbolically representing hundreds of historical monuments in this category.

Bârsana and Rohia are favorite destinations of pilgrims and tourists who are also attracted by the area's cuisine.

BAIA MARE MUNICIPALITY is located in the Maramureș Depression, at the foot of the Gutâi Mountains. As tourist attraction in Baia Mare you can visit:

The Museum of Mineralogy - is the largest regional museum in Europe, many of the exhibits being considered unique in the world and heritage values.

Baia Mare Village Museum

This extraordinary photo of the Baia Mare Village Museum, representative of the authentic and traditional Maramures village, was selected and included in the Album with the most beautiful photos of European regions and cities, published on the CoR Europe Day 2021 website:

<https://cor.europa.eu/.../europe-day-2021-regions-and...>

Firiza Dam is a perfect place to relax on a weekend with friends, located in the heart of the surrounding forests

STEPHEN'S TOWER

is the bell tower of the former church dedicated to "King Saint Stephen" in Baia Mare.

Centrul Școlar de Educație Incluzivă Baia Mare

- The school's **vision** refers to the promotion of a quality education and personal development in order to ensure the social integration/reintegration of students with SEN and people in difficulty.
- CSEI Baia Mare's **mission**: an open school that responds to the needs of students with SEN and people in difficulty by stimulating and developing communication, learning, relationship and social-adaptive skills.
- CSEI Baia Mare's **motto**: "A chance for everyone".

Centrul Școlar de Educație Incluzivă Baia Mare este o instituție de învățământ special integrat care oferă, coordonează și monitorizează servicii educaționale specifice și care își propune să promoveze valorile și practicile societății moderne, să aducă îmbunătățiri în calitatea și echitatea educației și, mai ales, să reducă barierele sociale și prejudecățile.

The School Center for Inclusive Education Baia Mare is a special integrated educational institution that offers, coordinates and monitors specific educational services and aims to promote the values and practices of modern society, to improve the quality and equity of education and, especially, to reduce social barriers and prejudices.

Școala noastră este corelată cu specificul de învățare al elevilor, ținând cont de tipuri de deficiențe ale acestora. De asemenea, își concentrează atenția asupra finalităților educației: dobândire de abilități, atitudini, competențe, credințe și valori și favorizează creșterea încrederii în capacitățile și forțele proprii. Ea oferă servicii de instruire, educare, recuperare, profesionalizare și integrare socio-profesională pentru tinerii cu dizabilități, fiind un mediu deschis, prietenos, tolerant și democratic, fără discriminare și excludere.

The school was established in 1998 as a vocational school for students with disabilities, thus continuing the educational process and their vocational training, in order to integrate them into society. At the beginning, there were only two classes, with a number of 24 students, currently, there are 17 classes with 154 enrolled students.

Our school is correlated with the specifics of our students' learning, taking into account their types of deficiencies. It also focuses on the goals of education: the acquisition of skills, attitudes, competences, beliefs and values and promotes increased confidence in one's abilities and strengths.

It offers training, education, recovery, professionalization and socio-professional integration services for young people with disabilities, being an open, friendly, tolerant and democratic environment, without discrimination and exclusion.

Oferta educațională a Centrului Școlar pentru Educație Incluzivă este adaptată la nevoile de formare profesională identificate pe piața muncii și are în vedere formarea de competențe profesionale ale elevilor. Aceasta cuprinde cadrul educativ–terapeutic, compensator și de profesionalizare în următoarele domenii:

The educational offer of the School Center for Inclusive Education is adapted to the vocational training needs identified on the labor market and takes into account the training of students' professional skills. It includes the educational-therapeutic, compensatory and professionalization framework in the following fields:

- constructions, installations and public works, masonry-stone-plasterer specialization;

- mechanics, tinsmith/car painter specialization;

Education level: lower secondary education – technical path. Form of education: full-time.

- tourism and public food service, chef specialization;

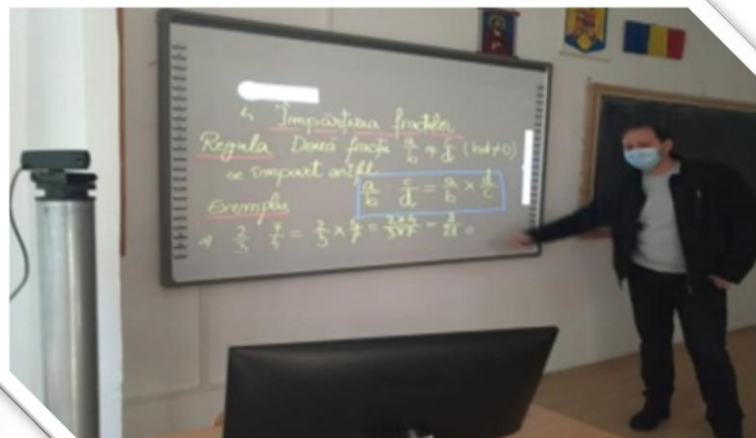

- textile and leather industry, textile manufacturer specialization;

- manufacture of wood products, specialization in universal carpentry;

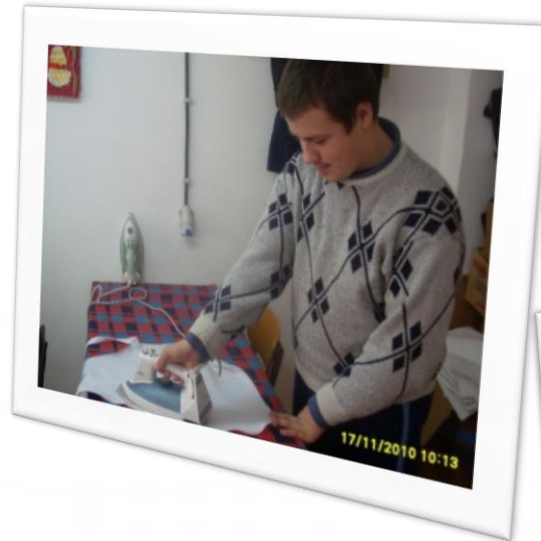

ADMINISTRAȚIA NAȚIONALĂ A
PENITENCIARELOR

The courses take place in the school's own buildings.

Workshops in which students carry out practical training activities.

The school has 5 workshops: mechanics (1), textile industry (1), public catering (2), constructions (1), as well as sheltered workshops for classes that have the recommendation of simple tasks under supervision, these working through the teachers' association "A chance for the craftsmen".

The therapeutic offer is individualized and adapted to the level of development of each student, to his needs, but also to the predictions on the development (taking into account the medical, psychological diagnosis, etc.). For this we have specially arranged facilities:

➤ a speech therapy office, equipped with specific materials necessary for the recovery of language disorders. The activity is carried out by speech therapists both through specific educational software and through classical methods.

➤ a psychodiagnosis office, where the evaluation, diagnosis, prognosis and psycho-pedagogical design is performed, as well as the professional guidance and school counseling of our students.

➤ cabinetul profesorilor de sprijin, unde se află toată documentație elevilor cu CES din școlile integratoare.

➤ the support teachers' office, where all the documentation for students with SEN from the integrating schools is located.

➤ sensory room where multisensory stimulation and relaxation activities are carried out, depending on the needs and specifics of the students. Using the sensory stimulation room causes, motivates, stimulates children with mental disabilities or calms children with autism / behavioral disorders.

KINETOTERAPIE

Începând cu anul 2010/2011, serviciile educaționale ale școlii noastre s-au extins și externalizat prin resurse umane specializate - **profesori itineranți și de sprijin și kinetoterapeuți**. Astfel, în prezent, un număr de aproximativ 157 elevi cu CES din 28 de instituții școlare, integrați individual sau pe grupe în unitățile școlare de masă (nivel primar, gimnazial, liceal), beneficiază de servicii educaționale de sprijin și kinetoterapie. Un număr de 16 cadre didactice își desfășoară activitatea în școlile integratoare, oferind servicii educaționale elevilor cu CES. Activitatea profesorilor de sprijin se desfășoară atât la clasă, în timpul orelor de curs, cât și individual în cabinetele școlare.

Starting with the year 2010/2011, the educational services of our school have been expanded and outsourced through specialized human resources - **itinerant and support teachers and physiotherapists**. Thus, at present, a number of approximately 157 students with SEN from 28 schools, integrated individually or in groups in mainstream school units (primary, secondary, high school), benefit from educational support services and physical therapy. A number of 16 teachers work in integrative schools, offering educational services to students with SEN. The activity of support teachers takes place both in class, during classes and individually in school offices.

In partnership with the Baia Mare Penitentiary, extracurricular activities took place. One of them is the exhibition "*Only souls, no walls*", which was organized at the "Petre Dulfu" County Library Baia Mare, on which occasion students-detainees and students of CSEI Baia Mare caroled together. Also, on the International Day of Education in Prisons, there was the performance of a play and recitations of poems, creations of those imprisoned.

- The project called “My world is wonderful too!”, which was revised and merged with the project „Young craftsmen from CSEI Baia Mare”

- The visits of delegations from Spain, Germany and France.

Privire spre viitor

Centrul Școlar de Educație Incluzivă urmărește cuprinderea și integrarea copiilor cu dizabilități din cadrul ONG-urilor. Primul pas a fost făcut împreună cu ONG-ul Asociația Esperando unde sunt cuprinși copii și adulți cu dizabilități neuro-motorii. În cadrul Asociației Esperando va funcționa o clasă CSEI, cu profesori și maiștri din școala noastră. Sperăm că acesta va fi începutul unei colaborări fructuoase cu cât mai multe ONG-uri pentru a ajuta adolescenții cu diferite tipuri de dizabilități să aibă o viață cât mai apropiată de normalitate.

Looking to the future

The School Center for Inclusive Education aims to include and integrate children with disabilities from within NGOs. The first step was made together with the NGO Esperando Association which includes children and adults with neuromotor disabilities. Within the Esperando Association there will be a CSEI class, with teachers and foremen from our school. We hope that this will be the beginning of a fruitful collaboration with as many NGOs as possible to help adolescents with different types of disabilities to have a life as close to normal as possible.
